To whom it may concern

10.12.2024

Washing recommendation of the XELGO stockings

The XELGO stockings can be washed at up to 60°C. Although there may appear some optical changes at the material when washed at 60°C, the function of the stocking will not be restricted by that. Washing at 30°C however would extend the lifetime of the product.

Test data are currently processed and can be delivered upon request.

Best regards
